Verified with notes by AssuredAI

This content was run through AssuredAI's compliance pipeline on May 16, 2026 at 4:04 PM. The hash chain at the bottom of this document cryptographically links the audit entry to every prior verification — back to the genesis record.

Audit #63 | Scenario: healthcare | Latency: 7,279ms

VERIFIED ARTICLE

Index funds are investment vehicles that track a market index, such as the S&P 500, by holding the same securities in the same proportions. They typically charge lower expense ratios than actively-managed funds because they require less day-to-day portfolio management. Over long horizons, lower fees compound into a meaningful difference for the end investor. Past performance is not indicative of future results. This material is for informational purposes only and does not constitute investment advice; consult a qualified financial professional regarding your individual circumstances.
